Skills

Mobile Development

Flutter, Dart, TypeScript, React Native, Expo, JavaScript

State & API Management

RESTful API (http), GraphQL, Provider, TanStack Query, Zustand

Web3/Blockchain

Ethers.js

Database

SQLite, MongoDB, shared_preferences

Tools

Firebase (Auth, Cloud Messaging, AI, Crashlytics, Analytics),
Git/Github, Postman, Figma, Docker

Certifications

04/2024 - 04/2026

TOEIC Listening & Reading: 770

03/2026 - 03/2028

TOEIC Speaking & Writing: 300

Huynh Chan Kiet

Mobile Developer

Summary

Mobile Developer with experiences in building scalable **Flutter and React Native** applications and integrating decentralized **Web3 protocols**. Proficient in **TypeScript/Dart** and modern state management, with a strong focus on delivering high-performance, user-centric mobile solutions.

Education

🎓 Computer Science // 09/2022 - 06/2026

University of Information Technology (UIT)

GPA: 7.92

Work experience

💼 **Fresher React Native** // 02/2025 - 06/2026

Interlinklabs

Description: Interlinklabs develops a global networking and blockchain ecosystem with over 5 million users worldwide. As a Mobile Developer, I collaborate closely with Design, Backend, and Blockchain teams to build responsive UIs and smooth experiences that make every interaction within the app feel seamless and intuitive.

Key features:

- Developed and optimized the UI/UX for a mobile app with 5M+ users, ensuring a smooth and consistent experience on both iOS and Android.
- Collaborated closely with Backend and Blockchain teams to integrate complex Web3 functionalities, including NFT management, WalletConnect, transfer token, and decentralized swap protocols.
- Built responsive interfaces that work perfectly across various mobile screen sizes.

Tech Stack: React Native, TypeScript, REST API, GraphQL, Firebase, ethers.js, TanStack Query, Zustand.

Project

👤 **Flutter App** // 04/2026 - Present

Github: <https://github.com/chankiet1804/FlutterApp>

Description: A cross-platform mobile application built with Flutter (Dart) following a feature-first / clean architecture, showcasing core Flutter techniques: the widget system, state management, RESTful API integration, user authentication, push notifications, and an AI chatbot.

Key features:

- Implemented state management with **Provider** with **shared_preferences** for local persistence to retain data across app restarts.
- Integrated **RESTful APIs (http package)** with async/await handling, and **infinite scroll pagination** to load news feeds page by page.
- Integrated an **AI chatbot** (Firebase AI) with conversation history.
- Developed **login/registration** using **Firebase Authentication**.

Tech Stack: Flutter, Dart, Provider, Firebase (Auth, Messaging, AI), RESTful API, shared_preferences, Material 3.
