Thu Duc, Ho Chi Minh city
linkedin.com/in/kiet-huynh-651bb6317

Skills

Mobile Development
TypeScript, React Native, Expo, JavaScript

State & API Management
RESTful API, GraphQL, TanStack Query, Zustand

Web3/Blockchain
Ethers.js

Database
SQLite, MongoDB

Tools
Git/Github, Firebase, Reactotron, Postman, Figma, Docker

Certifications

04/2024 - 04/2026

TOEIC Listening & Reading: 770

03/2026 - 03/2028

TOEIC Speaking & Writing: 300

Sumary

Mobile Developer with experiences in building scalable **React Native** applications and integrating decentralized **Web3 protocols**. Proficient in **TypeScript** and modern state management, with a strong focus on delivering high-performance, user-centric mobile solutions.

Education

Computer Science // 09/2022 - 06/2026

University of Information Technology (UIT)

GPA: 7.92

Work experience

Fresher React Native // 02/2025 - 06/2026

Interlinklabs

Description: Interlinklabs develops a global networking and blockchain ecosystem with over 5 million users worldwide. As a Mobile Developer, I collaborate closely with Design, Backend, and Blockchain teams to build responsive UIs and smooth experiences that make every interaction within the app feel seamless and intuitive.
Key features:

- Developed and optimized the UI/UX for a mobile app with 5M+ users, ensuring a smooth and consistent experience on both iOS and Android.
- Used TypeScript to develop features efficiently, keeping the codebase clean and easy to maintain.
- Collaborated closely with Backend and Blockchain teams to integrate complex Web3 functionalities, including NFT management, WalletConnect, transfer token, and decentralized swap protocols.
- Built responsive interfaces that work perfectly across various mobile screen sizes.

Tech Stack: React Native, TypeScript, REST API, GraphQL, Firebase, ethers.js, TanStack Query, Zustand.

Project

TOEIC Practice App // 09/2024 - 03/2025

Github: https://github.com/chankiet1804/TOEIC-practice-app

Description: A mobile application for TOEIC test preparation, built with React Native (Expo). Features include test-taking, result tracking, voice-based feedback, and performance analysis.
Key features:

- Implemented speech recognition to convert user speech into text (Speaking Section).
- Integrated OpenAI API to provide feedback on users' responses, helping them improve their answers (Writing Section).
- Developed the login and registration feature using JWT for user authentication.
- Developed API to retrieve question and user answer from MongoDB.
- Developed a clean, user-friendly UI/UX to enhance accessibility and ease of use.

Tech Stack: React Native, Expo, TypeScript, Node.js, Express, MongoDB, Docker.
