SUMMARY

Mobile Developer with experiences in building scalable **React Native** applications and integrating decentralized **Web3 protocols**. Proficient in **TypeScript** and modern state management, with a strong focus on delivering high-performance, user-centric mobile solutions.

EDUCATION

University of Information Technology (UIT)
Computer Science

09/2022 - 06/2026
GPA: 7.92

EXPERIENCE

Interlinklabs

Ho Chi Minh City
02/2025 - Present

React Native Developer

Interlinklabs builds the InterLink ecosystem with over 5 million users worldwide. As a Mobile Developer, I collaborate closely with the Design, Backend, and Blockchain teams to deliver smooth interfaces and in-app experiences.

- Developed and optimized UI/UX from Figma designs, ensuring responsive, consistent interfaces on both iOS and Android.
- Consumed RESTful and GraphQL APIs to connect with data services provided by the Backend team.
- Integrated Web3/Blockchain features: NFT management, WalletConnect, token transfers, and decentralized swap protocols.
- Integrated Socket.IO to power real-time chat features.
- Used AI tools (Claude Code, MCP) to plan, architect, and accelerate feature implementation, speeding up delivery by over 50%.
- Wrote code following MVVM and Clean Architecture for a scalable, maintainable codebase.

Tech stack: React Native, TypeScript, REST API, GraphQL, Socket.IO, ethers.js, TanStack Query, Zustand, Claude Code, MCP

App: Google Play, App Store

PROJECTS

TOEIC Practice App

github.com/chankiet1804/TOEIC-practice-app

A React Native (Expo) app for TOEIC preparation: test-taking, result tracking and voice-based feedback. 09/2024 - 03/2025

- Used expo-speech-recognition to convert speech to text for the Speaking section.
- Integrated the OpenAI API to give feedback and suggest improvements on answers for the Writing section.
- Used MongoDB to store user accounts and test results.
- Built a Node.js/Express backend with JWT authentication and bcrypt password hashing; the access token is stored with AsyncStorage.

Tech stack: React Native, Expo, TypeScript, expo-speech-recognition, OpenAI API, Node.js, Express, MongoDB, JWT, Docker

Music App

github.com/chankiet1804/Music-App

A music app built with Flutter - discover, search and enjoy your favorite songs anytime, anywhere. 09/2026 - Present

- Integrated just_audio to manage the music player.
- App-wide player state with Riverpod - playback continues seamlessly across screens.
- Used go_router for declarative navigation between screens.
- Fetched song data from the API via http.
- Background playback with lock-screen and notification controls via audio_service.
- Sign-in with Firebase Authentication (email/password, Google).
- Push notifications for newly released songs with Firebase Cloud Messaging.

Tech stack: Flutter, Dart, Riverpod, go_router, just_audio, audio_service, http, Firebase

SKILLS

Mobile Development: TypeScript, React Native, Expo, JavaScript, NativeWind
State & API Management: RESTful API, GraphQL, TanStack Query, Zustand, Socket.IO
Web3 / Blockchain: ethers.js, WalletConnect, NFT
Backend & Database: Node.js, Express, MongoDB, SQLite
AI-Assisted Workflow: Claude Code, Model Context Protocol (MCP), Agentic Workflows, Plan Mode
Tools: Git / GitHub, Firebase, Postman, Figma, Docker, Reactotron

CERTIFICATIONS

TOEIC Listening & Reading: 770	04/2024 - 04/2026
TOEIC Speaking & Writing: 300	03/2026 - 03/2028
